AI Engineer and Full Stack Developer with hands-on experience in building LLM-powered chatbots, Retrieval-Augmented Generation (RAG) systems, NLP applications, and AI-driven web platforms. Skilled in Python, Django, Flask, React.js, Node.js, and Generative AI technologies. Experienced in developing scalable backend systems, RESTful APIs, and intelligent automation solutions. Passionate about building production-ready AI applications that enhance user experience and business efficiency.

Skills

Technical Skills

Python, Flask, Django, SQL, Machine Learning, Deep Learning, Generative AI, LLMs, RAG Systems, OpenAI APIs, React.js, Node.js, REST APIs, FastAPI

Soft Skills

Communication Skills, Problem Solving, Adaptability, Emotional Intelligence, Team Collaboration

Certifications

AI Developer
June 2023- 2024
PIAIC

Web and Mobile App Development
Jan 2022- 2023
Saylani Mass Training Programme

Education

Sindh Madressatul Islam University (SMIU)
Bachelor Degree in Artificial Intelligence
Sep 2020 - 2024

Govt. College Women Saudabad Intermediate in Computer Science
April 2018 - 2020

Experience

Synergy Integrated Solutions April 2026 - Present
Python Developer

- Developed an AI-powered Education Management System using Django with AI-based question generation, lesson planning, and timetable automation.
- Built AI-driven automation features to improve educational workflows and personalized learning experiences.
- Developed a Python-based AI Calling Agent for automated lead generation and customer interaction handling. Built an AI-powered Payroll System for attendance, leave, and salary automation.

State Bank of Pakistan June 2024 – Aug 2024
Internship

- Developed an AI-powered FAQ chatbot for the Raast payment system using Flask, React.js, and OpenAI APIs to handle customer queries efficiently.
- Conducted research on Central Bank Digital Currency (CBDC) and prepared a detailed analytical report on its implementation and impact in Pakistan.

NEP NIC KARACHI TECHVIOCHATS July 2023 - Sep 2023
MERN Stack Developer Internship

- Built an AI-powered chatbot using React.js, Node.js, and OpenAI APIs. Applied NLP techniques for intent detection and conversation flow optimization.
- Collaborated on full-stack application development and AI feature integration.
